

Transcript of [An Opportunity To Heal The Environment](#)

A Message by the American mystic & sage Daniel Clay

Amongst all of the fear and pain, allow us to take a few moments to give you some positive thoughts. First, understand that tragedy besets all of humanity, and every generation has its own tragedies and its own travails. Every generation suffers according to their actions and every generation gets that which is necessary for soul growth and, ultimately, for the benefit of all of humanity.

At the moment, everyone is in an uproar and a panic. But a far greater threat to all of humanity has been occurring slowly and has reached the point that it was beginning to climb exponentially because of your destruction of your environment, your destruction of the Earth's fields of electricity and magnetism.

Because of your destruction of ozone and your emissions of carbon, the Earth has been sick. The Earth, Mother Earth, has been hurting. And now, as you take a break from all of your excessive use of carbon fuels and you quit draining the oil, the lifeblood out of the Earth. As you stop, the Earth has a few moments to heal. And healing, believe it or not, can be quick. Even a few weeks or a few months without excessive use of carbon-based fuels will postpone the inevitable desolation of the environment for years into the future. Because, if you use the time that you gained more wisely than some of you have used the time that you had gained with this virus, the COVID 19, you will be able to salvage your Earth and make it good again for generations to come.

We are not telling you that you will not have made changes that are hurtful. And some of them may take years, even decades or centuries to heal totally, but you are getting a new chance for that healing, if you make use of it when you come out of this seemingly horrible situation.

So, if there is a silver lining in what you call a pandemic, it is that it postpones the greater threat to human annihilation.

So, we tell you this, listen to what your governments are saying. Listen, when your leaders tell you to hunker down, stay away from activities that would take you out into crowds. For your slight sacrifice now is an investment not just in saving your life. It is an investment in saving your world, in saving life as you know it. *That* is a really huge blessing that comes out of this horrendous tragedy.

We leave your blessings and with peace.

Peace be with you.

Daniel Clay
